◆ Increment-specific Gr&C update proposal

- ◆ From ExPCP 39, action 39.10 (Determine the best process for approval of changes to the Increment-specific Gr&C) was levied (no actionee)
 - ◆ We presented a proposal to use an Internal Flight Note (IFN), but the Russian planners weren't sure that they had access to IFNs
- ◆ Propose that Increment-specific Gr&C updates are submitted via PPCR
 - ◆ Gr&C updates submitted as an attachment
 - ◆ Rationale for change included in the PPCR
 - ◆ PPCR title includes “[Gr&C Update]” so that the execution team does not review it
 - ◆ Only affected Partners and POIC included as reviewers
 - ✦ JSC will have to be a reviewer and assign reviewers in current PPCR tool
- ◆ Upon approval, PPM incorporates the updates and posts the document on the IOP (or replacement site)

Increment-specific Gr&C update proposal

◆ Benefits:

- ◆ The PPCR tool is utilized by all centers
- ◆ PPCR is monitored daily, unlike DCCS that is only used occasionally

◆ Forward work:

- ✓ Check that the document file size will not be an issue for the PPCR tool
 - Complete: PPCR tool can handle up to 100Mb file
- ◆ Determine the process for translating updates that affect Russia, such as Joint Research payload rules
- ◆ Work process details and document the process in OIP
